A python wrapper for the Soundcloud Charts API.

NOTE: This is a wrapper for a public, undocumented API.

CHAPTER 1

Dependencies

- Requests

CHAPTER 2

Installation

```
python setup.py install
```

or:

```
pip install soundcloud-charts-api
```

CHAPTER 3

Example

```
from soundcloudcharts import SoundCloudCharts

sc = SoundCloudCharts()
chart_data = sc.get_chart(region='us', limit=10)

for i, item in enumerate(chart_data['collection']):
    print('{0}: {1} - {2}'.format(str(i+1),
                                  item['track']['user']['username'],
                                  item['track']['title']))
```

CHAPTER 4

API Parameters

KIND:

- top
- trending (New & Hot)

GENRE:

- all-music
- all-audio
- alternativemusic
- ambient
- classical
- country
- danceedm
- dancehall
- deephouse
- disco
- drumbass
- dubstep
- electronic
- folksingersongwriter
- hiphoprap
- house
- indie
- jazzblues

- latin
- metal
- piano
- pop
- rbsoul
- reggae
- reggaeton
- rock
- soundtrack
- techno
- trance
- trap
- triphop
- world

REGION:

- au (Australia)
- ca (Canada)
- fr (France)
- de (Germany)
- ie (Ireland)
- nl (Netherlands)
- nz (New Zealand)
- gb (Great Britain)
- us (United States)

CHAPTER 5

client **Module**

CHAPTER 6

`api_base` Module

CHAPTER 7

Versioning

v1.0.1 - Initial Release - 08/18/2019 v1.0.2 - Fixed bug when using proxies - 08/19/2019 v1.0.3 - Updated file where key is found - 01/01/2020 v1.0.4 - Update to automatically find file with key - 03/09/2020
